PERSPEX™

FROST

PERSPEX™ FROST TURNS UP THE HEAT

Since its launch, Perspex Frost with its cool calm pastel colours has been hot property as far as POP and retail designers are concerned.

But now Perspex Frost is really turning up the heat, with the addition of 5 hot new colours to the range.

Chilli, a new hot red, *Citrus* a fresh vibrant yellow, and *Mandarin* a warm spicy orange, combine to make a bold bright colour statement.

Sapphire, a deep rich blue and *Emerald* an intense vivid green add a jewel-like richness to the collection.

Created with today's bold, confident designs in mind, these new colours add yet another dimension to the Perspex Frost offer.

The original colours in the range, *Crystal* clear, *Polar* white, *Glacier* green and *Arctic* blue plus the incredibly popular *Lemon Sorbet*, *Blush* pink, and *Aurora* violet remain firm favourites with designers looking for a subtle, more relaxed look.

But if it's a strong, dramatic statement that you want to make, then the new Perspex Frost colours are definitely for you.

Whichever you choose, you can be confident in the exceptional Perspex product performance characteristics of strength, durability and quality and sure that whether in corporate imaging, POP or retail displays, Perspex will deliver.

These hot new colours from Perspex Frost offer designers even more choice and freedom to inspire their creativity - now that really is something to get heated up about!
